

## Healing Nations Vision

A world that recognizes and declares God's glory as individuals, communities, and nations experience healing through truth and compassion.

## Project Objectives

To demonstrate Gospel truth, love, and compassion to marginalized Haitians through prayer, teaching, and sharing tangible resources while experiencing cross-cultural ministry and the universal nature of the body of Christ.

## Field Partner

United Christians International

## Trip Dates

May 13-22, 2026.

## Travel & Project Itinerary

The exact activities of your week will be scheduled at a later time, but will likely include:

- Working on a construction project alongside Haitians
- Helping with food distribution centers for vulnerable children
- Helping teach primary education/crafts
- Engaging in conversational English with university students
- Sunday School lessons for kids
- Teaching adults
- Door-to-door visits with prayer in a church planted community.

## Your Healing Nations Team

**Mike Bell** is your Missions Mobilizer. He will oversee and organize the planning of your trip, working closely with UCI in preparing project activities on your behalf.

A Healing Nations Team Engagement staff member will oversee and organize the travel and lodging for your trip.

**Janet Deschamp** will be your Healing Nations Team Leader. She will travel with you and work on your behalf coordinating the daily schedule while in Haiti and managing the logistic details associated with the trip.

## Food & Lodging

Expect a mix of familiar foods with a Haitian twist and some local fare.

## Weather

High humidity and high temperatures in the 80s and 90s during the day. There is no AC at the accommodations.

# Application Process & Deadline

Checklist:

- Complete the online application by February 1, 2026: [healingnations.net/trip-application/](https://healingnations.net/trip-application/)
- Submit a color copy of your passport photo page with your application
- Submit your non-refundable deposit of \$500 paid online [healingnations.net/donate](https://healingnations.net/donate) or mailed to:  
Healing Nations  
138 E 12300 S, Ste. C-222  
Draper, UT 84020

We accept applications on a first-come, first-served basis. All applications require two references (employer/peer and spiritual). If you need to renew your passport, or you do not have one currently, we need your name exactly as it will appear on your passport. Your passport must not expire within 6 months of travel. If this is the case, you will need to apply to renew your passport as soon as possible. The online process for passports can be [found here](#).

## Financial Information

**The trip cost is approximately \$2,500 USD.** This is subject to final flight bookings and the final number of individuals traveling. Incremental payments will be due over a period of months preceding the trip.

- **The trip cost includes:** flights; airport fees; food, lodging, and transportation within Haiti; travel insurance and project costs.
- **The trip cost does not include:** souvenirs; meals while traveling outside of Haiti; or immunizations – see below.

## Health

Healing Nations strongly suggests that all travelers be immunized against Hepatitis A and B and are up to date on their tetanus. Please check with your local travel clinic to schedule these vaccines. It is *recommended* that all team members be fully vaccinated for COVID-19, and it is *recommended* to be boosted within 6 months of travel. All travelers should visit either their doctor or a travel health clinic 4-8 weeks before departure.

### Zika Virus

Haiti has been affected by the Zika virus. This is a disease caused by a virus that is primarily spread through the bite of an infected mosquito. Because there is no vaccine or treatment for this disease, people visiting areas with Zika should take steps to prevent infection such as wearing mosquito repellent and avoiding standing water.

Many people who get infected with the Zika virus never have symptoms. In people who get sick, symptoms (fever, rash, joint pain, and red eyes) are usually mild and last up to one week. The mosquitoes that spread Zika usually do not live at elevations above 6,500 feet. People who live in or visit areas above this elevation are at very low risk of getting Zika from a mosquito unless they visit or travel through areas of lower elevation. Zika can spread through sexual transmission. People with Zika can pass Zika to their partners even if they do not have symptoms at the time, or if their symptoms have gone away. Zika can live in semen for up to 188 days. Zika can cause miscarriages, stillbirths, and serious birth defects in babies born to women who were infected with Zika during pregnancy. Zika has also been linked to Guillain-Barre syndrome. Please use the following link to read about the risks associated with traveling to a country affected by the Zika virus: <https://www.cdc.gov/Zika/>
